B KUBE BY 5LAB

The stackable storage system B_Kube by 5Lab is made up from a multitude of interchangeable squares.

These linear forms allow for three different configurations, allowing the fun furniture

pieces to serve as seating, shelving as well as side tables.

The modular pieces can be used on their own or stacked accordingly to act as a modern, stacked storage unit. B_Kube can be constructed out of oak or black MDF, allowing for two opposing looks.

These contemporary cubes can be stacked and grouped into a modern bookshelf configuration, used alone as a compact side ottoman or even as a T.V tray table. Moreover, this functional furniture piece can also serve as a roomy storage box, fitting perfectly into any design-savvy space.
